When light, work very little. Cut in pieces. Mould into loaves. Put into greased tins. Let rise (not too light), bake 35 minutes. This can be mixed in the morning and baked by noon. When made with compressed yeast, bread should be worked very little. Other yeast requires much more working.

Bake when light from  $\frac{3}{4}$  of an hour to an hour in a moderate oven.

**SALT RISING BREAD**—Scald a pint of water and stir into it  $\frac{1}{2}$  teaspoon of salt and add a little at a time, enough flour to make a stiff batter or a soft dough. ### A FEW SUGGESTIONS IN CAKE MAKING

If you would have really good cake, these things are worth remembering. Use a standard measuring cup, Swans' Down Flour and its measurements. For Dr. Price's Cream Baking Powder, get the finest granulated sugar and sift several times; measure flour after each sifting; put baking powder in last half of flour used. Cream the butter with your hand, (the heat from the hand keeps it the right consistency); add sugar, little at a time; keep the batter creamy. Add a little flour and milk, and keep a regular beating—always the same movement. When ready to fold in whites, beat them to a stiff froth, never stopping till folded in batter, using the egg beater. Do not stir. Use quick oven. Oil paper, slightly greased, and placed in bottom of pans is the better plan. Keep cakes in warm place when taken from oven.

To keep cakes from sticking, rub pans with lard, dust with flour, shaking off all that will fall when pan is rapped sharply with spoon. Cake will never stick if this is done.

**TO PREVENT CAKE FROM FALLING**—When pan is ready for oven, drop on table once or twice, raising pan a foot above table. Drop flatly forcing out bubbles of air.

**ANGEL FOOD**—The whites of 11 eggs,  $1\frac{1}{2}$  cups of granulated sugar, 1 cup pastry flour, 1 teaspoon cream of tartar, 1 teaspoon vanilla. Sift flour and sugar separately 5 times, add sugar and flour a little at a time to the eggs; bake in a pan which has never been greased. Bake 45 minutes.

**DEVILS FOOD**—Two cups dark brown sugar creamed with  $\frac{1}{2}$  cup butter, yolks of 3 eggs, 1 cup milk, add one cake of Walter Baker's sweet chocolate grated,  $2\frac{1}{2}$  cups flour into which has been sifted 2 teaspoons baking powder, 1 very small teaspoon soda dissolved in a little water; bake in two layers, put together with caramel icing.

**DELICIOUS LOAF CAKE**—One and a half cups of sugar,  $\frac{2}{3}$  cup butter. Work these together until they form a cream; add the whites of 5 eggs beaten to a stiff froth. Stir and beat until light as foam; add  $\frac{1}{2}$  cup of cornstarch which has been dissolved in a little sweet milk. Stir in not quite  $\frac{2}{3}$  of a cup of sweet milk and  $2\frac{1}{2}$  cups sifted flour, 2 teaspoons of baking powder and 1 of vanilla. Ice with boiled icing flavored with lemon. Do not use same flavoring in the cake as in the icing. Bake 4 days before using, when it will be rich enough to melt in your mouth. Moderate oven. Never fails.

**MINNEHAHA CAKE**—One and one-half cups sugar creamed with  $\frac{1}{4}$  cup butter,  $\frac{1}{2}$  cup milk, 2 cups flour, 2 teaspoons baking powder, whites of 6 eggs; bake in layers. **BOILED FROSTING**—All housekeepers have at times had the experience of having boiled frosting run off the cake. It is pretty hard to judge just when to remove the syrup from the fire. Use 1 cup of sugar,  $\frac{1}{2}$  cup of water and boil till it spins a thread. Pour slowly over the stiffly beaten whites of two eggs, beating with a spoon all the time while pouring. ## Candies

**FRENCH FONDANT**—Use equal parts of thick sweet cream and white of egg unbeaten, stir in enough XXXX confectioner's sugar (use no other) to make dough to mould. Here you have the body of all delicious cream candies. Any reliable druggist will procure for you absolutely pure vegetable coloring fluids at 10 cents per bottle, enough to last 10 years. This cream candy is a real delight because no cooking is needed.

Fondant used to stuff dates, figs and nuts, and for an endless variety of chocolate creams, nut rolls, nougat, fruit loaf.

Boiled Fondant forms the basis for nearly all cream candies. Use pure granulated sugar, XXXX. Be careful not to get blue looking moist sugar, for this is beet sugar, and will not make good fondant. A rainy day you will not have success as on a clear, cool day.

**BOILED FONDANT**—One pint sugar, milk or water to dissolve, boil till spoonful dropped into cold water makes a firm ball, not crisp. Set dish immediaely in pan of cold water. When it begins to cool nicely beat to a cream, mould into a loaf and set away in a cool place to ripen. Should you desire candies at once, this is not necessary. If you wish to use different flavors and colors, while still beating to a cream, add colors and flavors before you mould into loaves; also chopped nuts and candied cherries for nut creams; chopped figs and dates for fruit creams, etc. As you may seek variety, form candies into blocks, rolls, cones or wafers.

Now you are ready for almost any variety of cream candy.

**CHOCOLATE FOR DIPPING**—Use equal parts of Walter Baker's unsweetened chocolate and fondant. Melt in granite dish set in hot water, add 1 spoonful of melted paraffine to chocolate, beat thoroughly while hot, roll candies in chocolate, and with a dexterous turn of the wrist, pick up and lay quickly on paraffine paper. You can make a large sheet of this yourself by brushing melted paraffine over white wrapping paper. Never mind if you do get your hands "rather mussy," it is far quicker done than using a fork. However, please yourself. Cover fruit or nut loaf.

**NOTE**—I find to be absolutely sure of good results I must use Walter Baker's chocolate for candies. It is certainly sure

as well as pure and you cannot get good results with an adulterated product.

**DIVINITY**—Boil 2 cups sugar, 1 cup corn syrup, half cup water till forms soft ball in water—pour over beaten whites of 3 eggs, beating rapidly till light, cool and cut into strips. Add nuts if desired.

### *A Word to The Cook*

After picking poultry, rub briskly with corn meal to remove pin feathers.

A well-beaten white of egg added to mashed potatoes, whipping the potatoes hard before serving, will add much to the looks and taste.

If fruit stains on linen are moistened with a little camphor before the stain has been wet with water, they will entirely disappear.

Ground cloves are excellent in cupboards where ants are found. They will not cross a circle of cloves.

Save the small pieces of nutmeg that are too small to grate and put into the meat grinder, with the fine knife on. This will be a great saving of nutmeg as well as fingers.

If sweet potatoes are greased before baking they will be much softer and sweeter.

Welsh rarebit will not curdle or become stringy if a small pinch of soda is added.

**"TO POACH"**—Grease sauce pan with unsalted fat, and put in water to fully cover eggs. Be sure it is boiling. Draw to side of stove and drop in eggs one by one. Let stand where it is hot but not boiling till eggs are cooked.

One-half pound loaf sugar, 1 tablespoon saltpeter; boil all together. strain, cool, wrap butter in cloth; put in brine and weight down.

**REMEMBER** that tomato poured, a little at a time, into milk and stirred, does not curdle; milk poured into tomatoes, does curdle. This is worth remembering when making soup.

**WHIP CREAM** in a fruit jar by shaking it up and down for about five minutes. This saves much whipping in the ordinary way and also saves the cream, as not a drop escapes.

**SAVE** the water off mashed potatoes. It's fine for the soup kettle.

**EVERY CAREFUL COOK** should have a soup kettle. The bones and fat left from roasts, or bones cut from steak, and bits of vegetables added each meal to the soup kettle, will almost furnish soup for every day's dinner, if kept in a cool place and well covered.

**KITCHEN HERBS**—For seasoning and relishes no kitchen should be dependent on costly imported spices when a small section of the garden can be made to produce a variety of herbs to please the most exacting.

"In a back yard plan we grow thirteen varieties in a space three feet wide and ten feet long at the north lot line: Chives, celery smallage, parsley, chervil, sweet basil, summer savory, thyme, fennel, anise, sweet marjoram, dill, mint, and sage.

Tarragon should really have been added or even substituted for some one of those."

**To reduce the disagreeable smell when boiling cabbage,** add to the water a toasted bread crust.

**When vegetables or other foods become scorched,** remove the kettle from the stove and put it into a pan of cold water. This will remove the scorched taste.

**ALL FRUIT** should be pretty well covered with water. An inch or an inch and a half from covering.

**CUCUMBER PICKLES**—To a gallon of vinegar, add a cup of ground mustard, 1 cup grated horseradish,  $\frac{1}{2}$  cup of salt, wash pickles, put in vinegar, weight down and cover. These will be brittle and keep indefinitely. When sweet pickles are wanted take them out and cover with warm, sweetened spiced vinegar.

**PICKLED BUTTER NUTS AND WALNUTS**—Pick green nuts the last of June, make brine strong enough to hold an egg, cover nuts with brine for 6 days, wash off brine, cover with boiling vinegar, add 1 cup of brown sugar, 1 ounce of cloves, 1 of cinnamon, 1 of mustard seed, 1 ground nutmeg. Let stand three days, throw away the vinegar and prepare fresh vinegar in the same way, heat to boiling point, add 1 tea-cup of ground horseradish,  $\frac{1}{4}$  pound of ginger root, place nuts in stone jar; cover with vinegar. Put a layer of the corn in a large earthenware dish, then a layer of salt and sugar, till all are used up, and allow to stand over night. **CANNED CORN**—One pint sugar, 1 pint salt, 2 pints water and 9 pints corn. Bring to boiling point; boil hard for 10 minutes. Seal while hot in glass jars. Wrap well and put in a cool dry place. When opened to use, if too salty, soak over night and change to fresh water in the morning.

fill cans while very hot and put 2 tablespoons hot vinegar in each can. Seal immediately. Have cans thoroughly sterilized.

Fill the cans with the beans and the water in which they were cooked, add to each can 1 tablespoonful cider vinegar and seal.

**CANNED RED PEPPERS**—Cut around the stems of the peppers and remove them, then remove the seeds. Pour boiling water over the prepared peppers, cover and let stand for six minutes, to lessen the firmness and facilitate the packing.

Pack the peppers edgewise in the jars, pressing them in; set in place on a rack in a steam cooker, first laying a folded cloth over the rack.

**CANNED EGGPLANT**—Pare the eggplants, cut them in thin slices, and drop into boiling water. Allow them to remain for fifteen minutes, then drain off the water, and pack the slices in jars. Cover with cold water, add one teaspoonful of salt to each quart jar, put on the rubbers and tops, and boil for one hour on each successive day for three days.

Screw the covers tight.

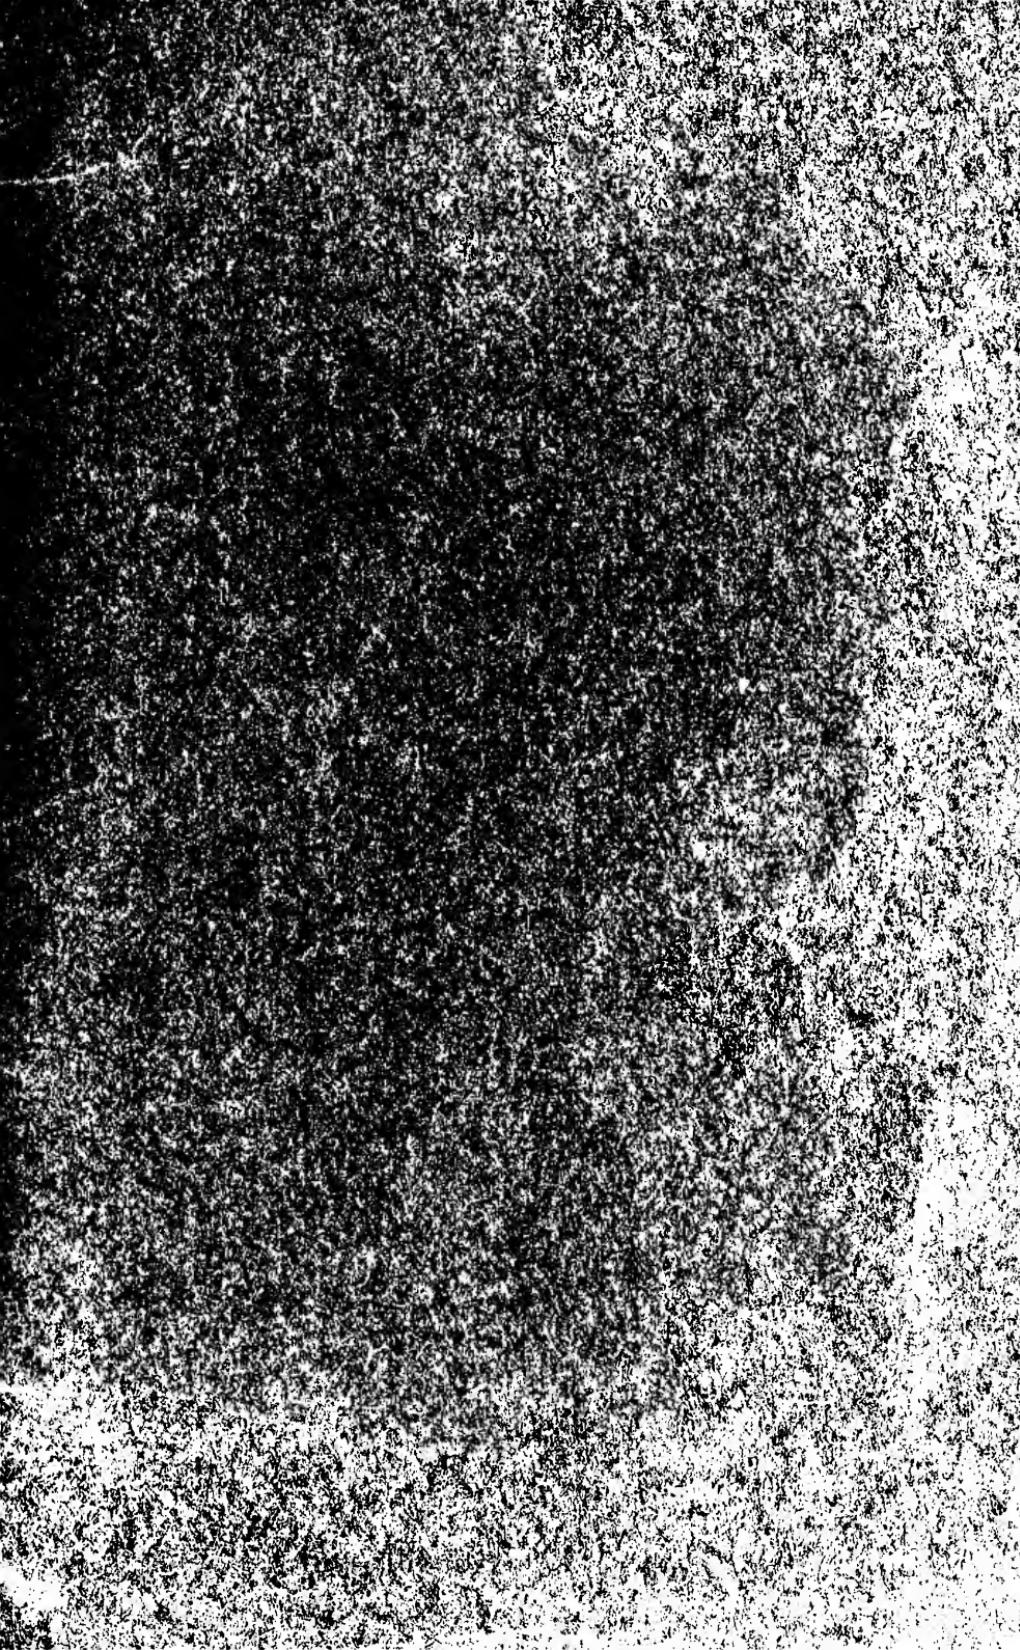

**STRING BEANS**—Cook 2 hours or longer till very tender. Season as for the table. While hot, fill glass jars, and before sealing, put 2 tablespoons hot vinegar on top of each can. Seal, wrap, keep dry and cool.

**BUTTER BEANS**—Cook till done, 5 quarts freshly shelled buttered beans; then add 1 even tablespoon salsillic acid and cook 10 minutes more, (be careful not to cook them to a mush). Seal hot in glass jars; wrap well.

Peas and asparagus can be canned same as butter beans.

**STRAWBERRY PRESERVES**—Cook just 2 pounds at a time. 2 pounds solid berries with 3 pounds sugar. Put berries in porcelain kettle over slow fire; add sugar, very little at a time until all is used. The berries make their own juice. Boil 10 to 15 minutes.

You can add several "makings" together. Heat all together; stir gently, and after cold stir again, mixing syrup and berries, and can cold. Put in cans or jelly glasses and cover with hot parafine. This is excellent.
